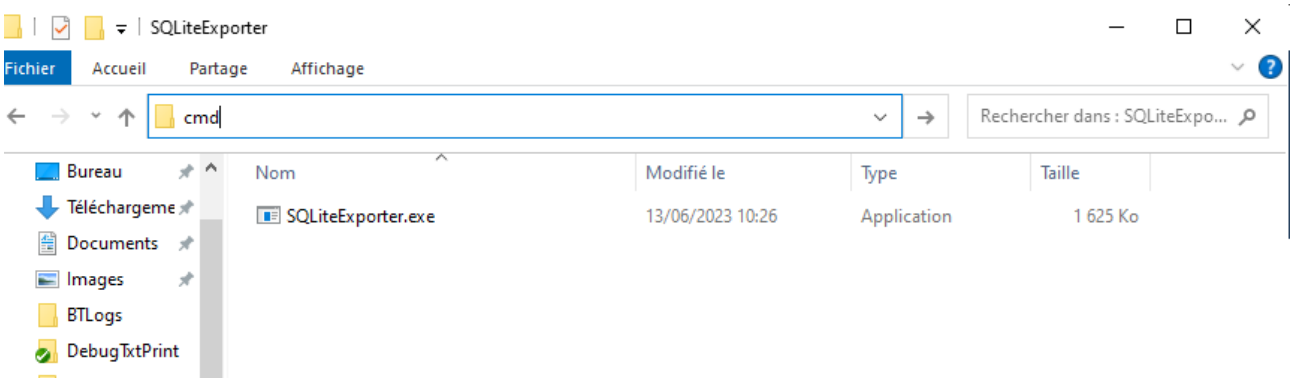
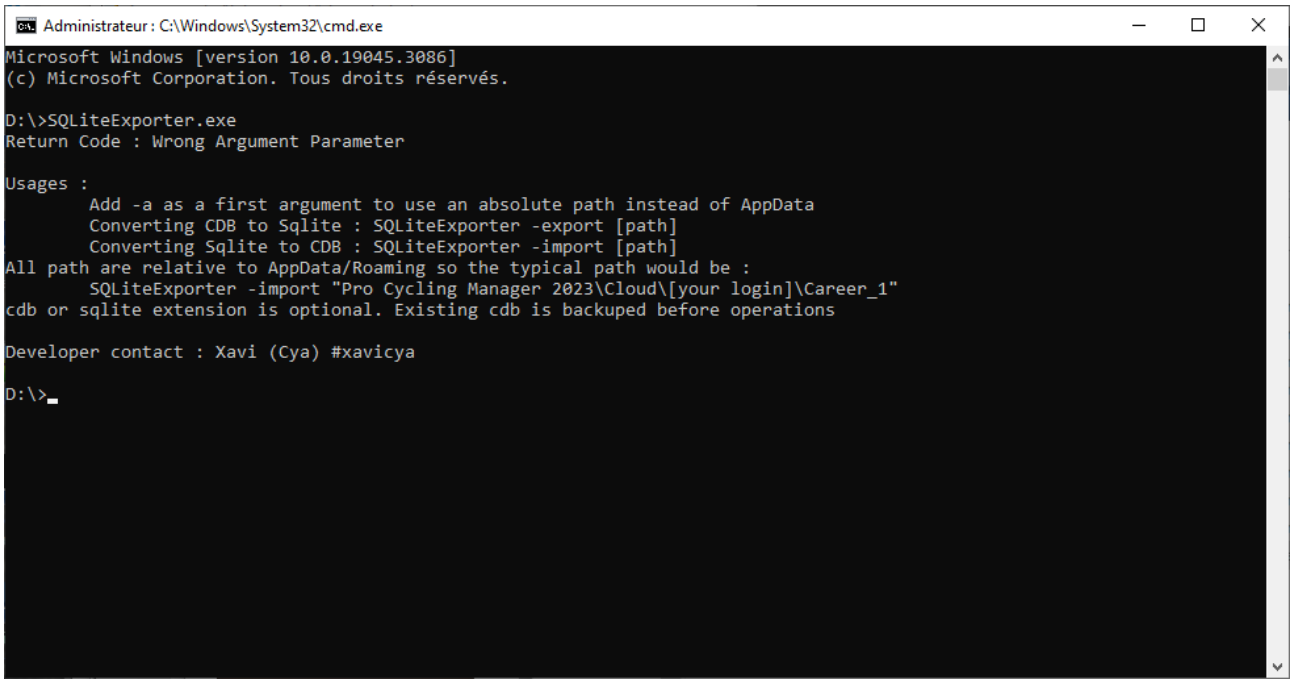
How to use SQLiteExporter.exe

1. Download the zip from the discord forum (in the modding section)

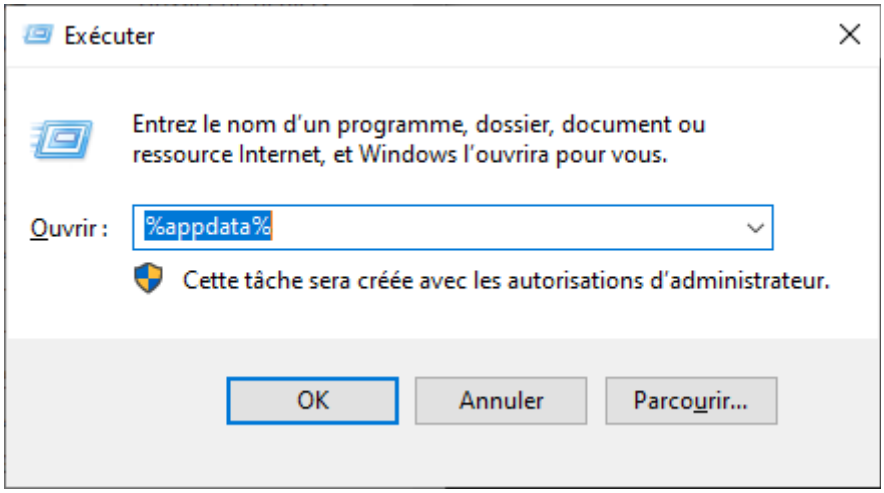
2. Unzip the file in any folder and type ‘cmd’ in the adress bar



cmd will open a command prompt where you can type ‘SQLiteExporter.exe’ to show the usage
Note : It is possible that you need to be administrator to use the exporter.



3. Locate your PCM Save folder by combining Windows Key + R and entering %appdata %



It is supposed to bring you to C:\Users\[your windows user]\AppData\Roaming and then you can browse to Pro Cycling Manager 2025\Cloud\[your steam ID]

You may copy Pro Cycling Manager 2025\Cloud\[your steam ID] to your clipboard to reuse it later.

Tutorials.xml	11/06/2023 10:25	Fichier XML	1 Ko

You may want to use absolute paths instead of path relative to Appdata. In this case use the argument parameter ‘-a’ before export/import command, e.g :

SQLiteExporter.exe -a -export "D:\MyWorkspace\Career_5"

4. Back to your command prompt, you can try to export a cdb. For example, let’s export Career_5 from the previous screenshot :

SQLiteExporter.exe -export "Pro Cycling Manager 2025\Cloud\CyaXavi\Career_5"

If every thing went fine it should prompt you info ending with Return Code : Success. You can notice a new Career_5.sqlite in your folder.

5. Now that you have a SQLite file, you may edit it on any SQLite client software. There are various SQLite UI software that you can use : HeidiSQL, Dbeaver, DB Browser for SQLite, SQLiteStudio, there is a lot of possibilities (https://dbmstools.com/categories/gui-tools/sqlite)

Example with DB Browser :

	IDcyclist	gene_sz_lastname	gene_sz_firstname	gene_sz_firstlastname	fkIDteam	fkIDregion	fkIDcontract	fkIDprevcontract	fkID
	Filtre	Filtre	Filtre	Filtre	Filtre	Filtre	Filtre	Filtre	Filtre
1	2	Zeits	Andrey	Zeits A.	12	1301	1230	0	0
2	4	Madouas	Valentin	Madouas V.	6	305	614	0	0
3	16	Mollema	Bauke	Mollema B.	11	505	1116	0	0
4	17	van Emden	Jos	van Emden J.	14	512	1427	0	0
5	86	Gallopin	Tony	Gallopin T.	11	310	1108	0	0
6	111	Hollenstein	Reto	Hollenstein R.	42	1701	4211	0	0
7	126	Hermans	Ben	Hermans B.	42	402	4210	0	0
8	139	Sánchez	Luis León	Sánchez L.L.	12	817	1225	0	0
9	178	Taaramäe	Rein	Taaramäe R.	65	1201	6523	0	0
10	189	Chérel	Mikaël	Chérel M.	3	316	305	0	0
11	222	Madrazo	Ángel	Madrazo Á.	92	806	9215	0	0
12	257	Bodnar	Maciej	Bodnar M.	25	3001	2502	0	0
13	264	Boasson Hagen	Edvald	Boasson Hagen E.	25	3501	2501	0	0
14	273	Fernández	Delio	Fernández D.	38	812	1	0	0
15	300	Konovalovas	Ignatas	Konovalovas I.	6	1401	609	0	0
16	301	Froome	Chris	Froome C.	42	1801	4206	0	0
17	306	Impey	Daryl	Impey D.	42	3601	4214	0	0
18	316	Livramento	David	Livramento D.	38	2905	2	0	0
19	349	Maté	Luis Angel	Maté L.A.	100	814	10019	0	0

Now you can edit, add, delete cells as you want. **Don’t forget to save modifications** once you are done. You can also make SQL queries on the content if you want.

6. Now you edited the db, you can import it back to a modified cdb by the very similar command as in part 4/ :

SQLiteExporter.exe **-import** "Pro Cycling Manager 2024\Cloud\CyaXavi\Career_5"

Important : do not put the extension .sqlite on the command line, otherwise the command will fail.

If it succeeds, you should observe that Career_5.cdb is now updated and that a backup of the former cdb has been made to make sure you don’t corrupt your save with your modification.

I still suggest to make your own backups before making modifications.

7. You can now load Career_5 again in PCM and play with your modified data.

You can report problems on the discord modding forum to get support.
